

Ashley Watt, Texas

-Most "requests for inspection" should more accurately be categorized as "complaints"

-RRC is not doing enough to investigate contamination to groundwater resources. This onus currently falls on landowners. RRC is failing the citizens of the State of Texas in favor of oil and gas companies. -
When groundwater is contaminated, RRC needs to require full groundwater remediation.

-RRC currently does not issue high enough fine amounts. Only \$3.7 million of fines across the entirety of the Texas oil and gas industry is not a large enough number to deter anyone from breaking RRC rules.
